FOR CAPTAINS AND VICE-CAPTAINS ONLY

Captain's corner

How to bid, plan and win your squad from your phone during the auction. Five minutes to read, keep it open on the day.

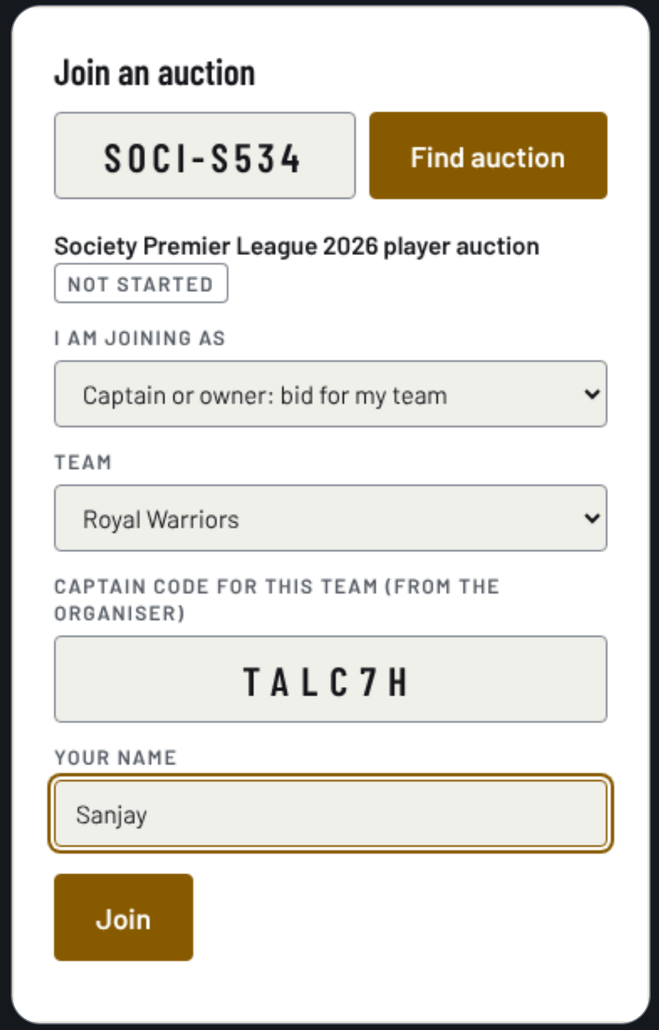

KEEP YOUR CODE PRIVATE

STEP 1 · BEFORE THE AUCTION

Join once, with your own code

1. Open the **join link** the organisers sent you (or scan the QR poster).
2. Choose **Captain** (or **Vice-captain**) and **your team**.
3. Type **your code** and your name, then **Join**.
4. Do it the evening before: the phone remembers you on the day.

> Captain and vice-captain each have **their own code**. Never forward it: anyone with it can bid for your team.

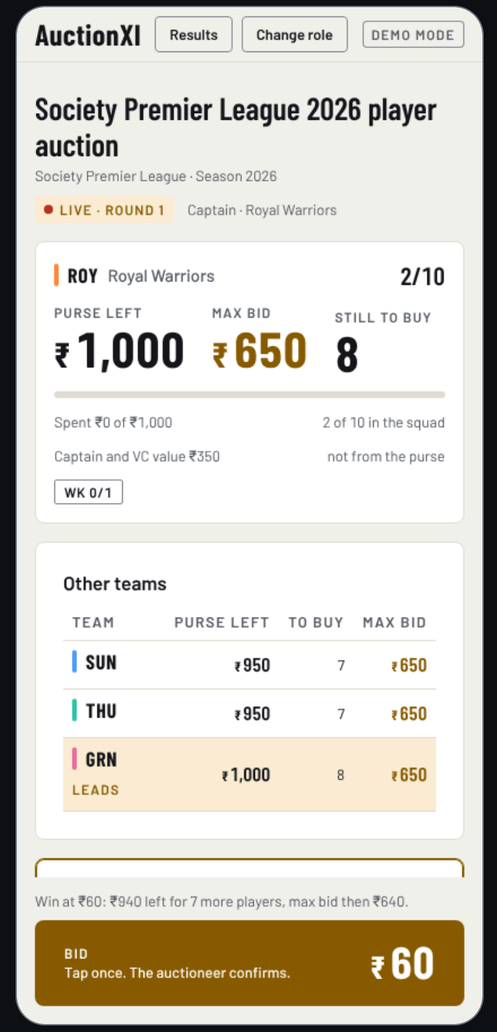

STEP 2 · YOUR SCREEN

Top of the page: you, then the others

Purse left	Points you still have.
Max bid	The most you may bid **for this player**. It always keeps enough to fill your squad at base price, so you can never get stuck.
Still to buy	Places left in your squad.
Other teams	Their purse, places left and max bid, if the organisers show them. A team whose max bid is lower than the price can't beat you.

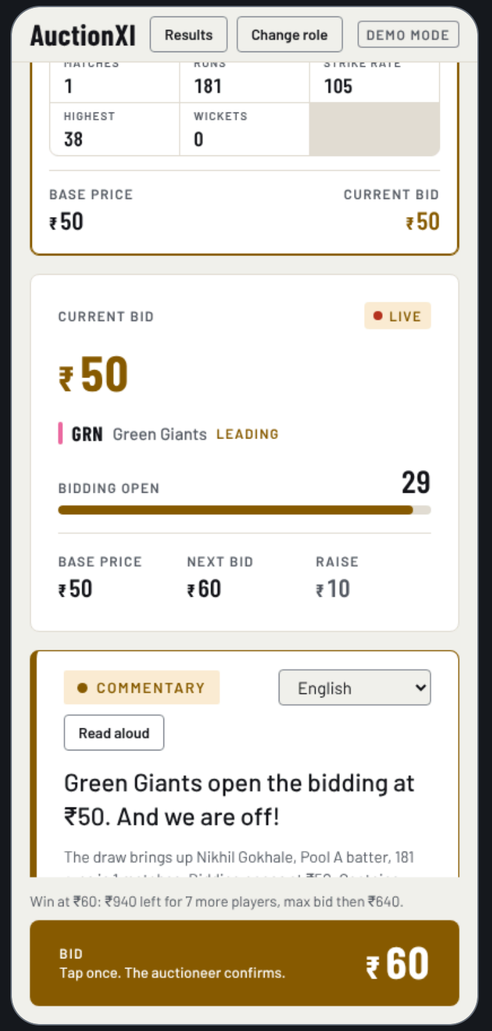

> Watch the other teams' **max bid**: when only you can afford the next step, bid once and wait.

STEP 3 · BIDDING

One tap = one step up

- The gold **BID** button at the bottom always shows the **next price**. One tap bids exactly that.
- Bids go up in fixed steps (e.g. +10, +15, +20). The app never lets you bid above your max bid.
- Just above the button: **"Win at ₹60: ₹940 left for 7 more players"**, what winning does to your budget.
- "**Leading**" means you hold the bid. "Outbid" means someone was faster: look at the new price and tap again if you want.
- Verbal bids in the hall still count: the auctioneer enters them, your screen updates.

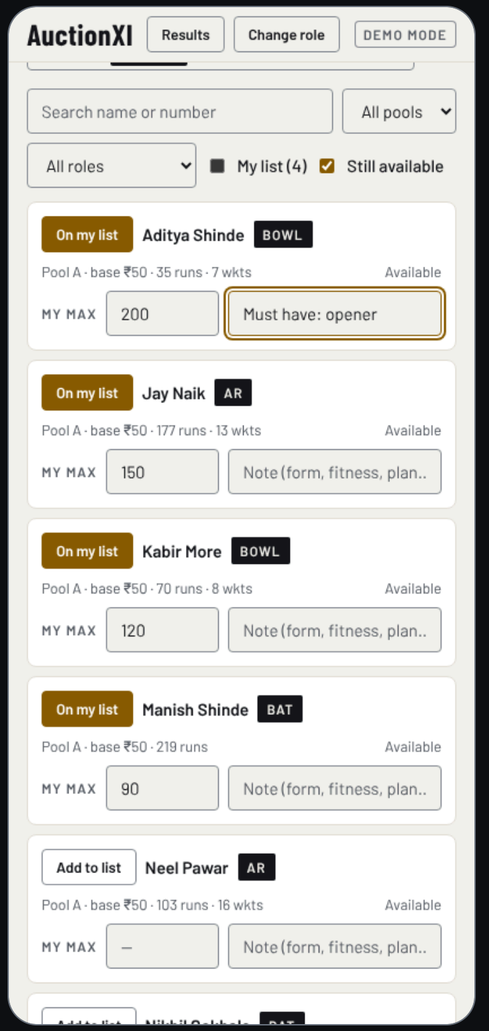

STEP 4 · MY WORKBOOK

Your private target list

1. Open the **My workbook** tab and set a **4-digit PIN**. Only you can read it: not the organisers, and not your VC (they get their own workbook).
2. In **Players**: tap **Add to list** for the players you want.
3. Type **My max** for each, and a note ("must have: opener").
4. During bidding your max shows up: **"Your limit for this player: ₹120"**.

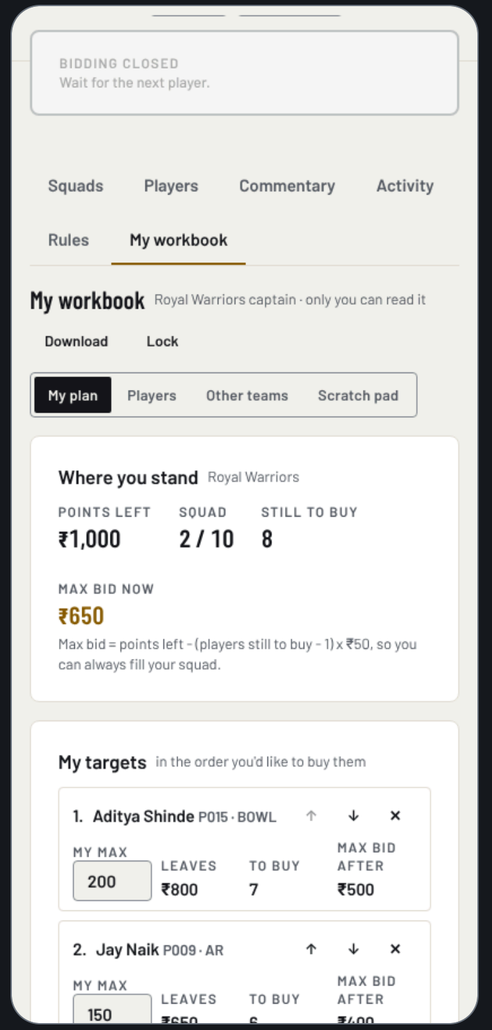

> Fill this in **before** the auction. On the day there is no time to think.

STEP 5 · MY PLAN

See what each buy leaves you

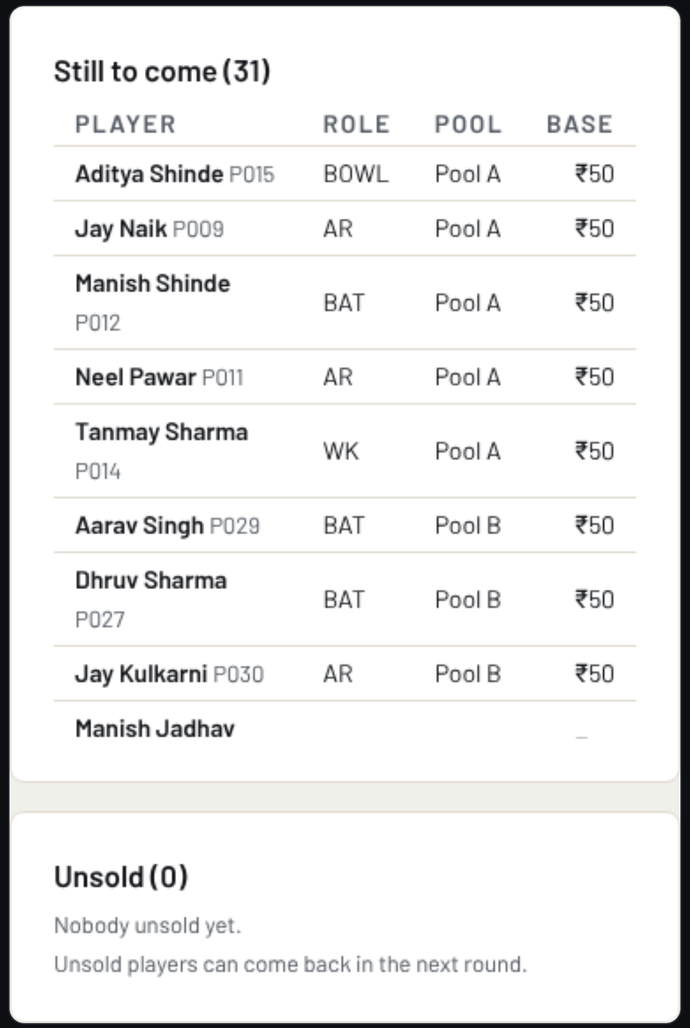

- **My plan** lists your targets in order: what each one **leaves** in the purse and your **max bid after**.
- Red means the plan doesn't fit: lower a max, or drop a target.
- **What if I buy...**: pick any player and a price to see your squad and budget after.
- The plan updates by itself after every sale.

STEP 6 · THINK AHEAD

Who is still to come

- Below the player: **Still to come** (this round, by pool) and **Unsold**.
- If many good players of a role are still to come, don't overpay now.
- Unsold players come back in the next round, often at the base price.
- **Squads** tab: every team's players so far, the latest buyer first.

ON THE DAY

Rules worth knowing

Tie at the same price

If two teams call the same price together (or both are at their max), the auctioneer runs a **tie-breaker draw** on the screen. The winner gets the player at that price.

The hammer is final

A sale is done when the auctioneer marks it **SOLD**. Mistakes are corrected only by the organisers.

Phone ready

Charged, on Wi-Fi or data, screen timeout off. If the connection drops, a bar says so; bids can't be sent until it's back.

At the end

The big screen and every phone show the **final squads** by themselves. Your workbook can be downloaded.
